Use Google Analytics to send statistics to us: Customer Reviews Rating Review by alexander 4.3 / 5 It works great and the level of detail on the background and the time can be adjusted. Very easy to do! by alexander 3.6 / 5 Excellent, but after loading the same image twice the next time you see it in your list you'll get just the first image with a black background, then after each refresh it's back to the first image, no explanation on your site what happens. by someguy 3.0 / 5 Other than the widget design, this clock is great. I used it to make a live clock on my home page. I created a website for a friend and used this to add the clock to the page. The images you use as the clock are really cool and fun to look at, and the functionality works great. Only problem I have is that when I use it, it changes the color of all the fonts on my website. I don't like that. by something 4.8 / 5 I love this widget. I'm going to be using it on my web site. by user 4.5 / 5 This clock is superb. You can use it with a number of themes, as the background loads from a Google image search. You can add as many backgrounds as you want. The only issue I have with it is that the time is not always accurate. It is very accurate in the morning but it drifts. I'm not sure what causes it to drift or if this is just my site. I recommend it. by davemichal 5.0 / 5 Excellent work, I have been using it in my business. The client love it and keep on requesting. by targetted 5.0 / 5 This is a fantastic clock! I'm using it on my homepage. It's a complete redesign of my
