"We've given unprecedented attention to player movements as we've focused on providing more natural on-ball mechanics," said Matthieu Turpin, FIFA Lead Gameplay Engineer. "While we've stayed true to our gameplay core, the player sprints and dashes around the pitch faster than we've ever seen on the FIFA brand." Three new features in FIFA 22 have been developed using the HyperMotion technology. "Sprint the Whole Field" allows you to skip whole teams like they are passing to you. "Active Skill Control" calls for players to sprint full-speed towards open teammates, and "Active Drills" encourage players to teach and pass to teammates by performing a series of player sprints. Unlock every style and celebrate your favorite moves with new celebrations. FIFA 22 introduces "Motion Class," based on motion capture data from real-life athletes, which allow players to show off dribbling, ball control, shooting, headers, and more. Before we get the review, I want to thank the folks at EA for the opportunity to review the review version of the game. So what makes the game so special? Well, it's FIFA come to a later generation of consoles. Sure, there are exclusive content to the game (which I will detail in a second), but the biggest new feature in the game is the new feature of HyperMotion Technology. First, it's not as good as advertised. To be fair, this is a very early build, so we shouldn't expect everything from the full game. However, the skill moves and other features are simply mediocre at best, which isn't a good sign for this game if you are thinking about picking it up. Let's start with the basics, and I'm not talking about the game itself. How long do I have to use the game before I can see all 22 of the real life players, if they are even in the game. Sure, there are three different difficulty levels, but I played on the lowest difficulty, and the only way I saw any of the real life players was when they were on the screen and doing something. The only time I saw them was when they came off the screen and then came back. Yes, you can buy them, but with \$70 you get a FREE copy of FIFA 12, and if you didn't buy that, FIFA 16 isn't due out until later this year anyway. As a sports fan who plays

## **Fifa 22 Features Key:**

team – and never lose a negotiation. **NEW PLAYER INTERACTION ENGINE** Improved player interaction – ever so subtle improvements which add a new layer of depth to FIFA 22. Players now respond correctly to actions on the ball and react to contact as expected. They now visually demonstrate their emotions during live game moments and will react appropriately to interactions in-match. **GAMEPLAY** Reflect the weight of the ball in a more realistic manner when you're facing goal. Players will fall more often as they try to catch the ball – while sprinting. The ball's height will drop in direct proportion to its speed. **OFF THE PITCH PLAYER MOVEMENT AND SKILLS** The new Player Movement Engine makes every player look and behave uniquely. In FIFA 22, there are a lot more varied and realistic movement characteristics. Players with good overall athletic ability will have more naturally, and with lots of practise will be able to control the ball better. **IN-GAME COMBAT INNOVATIVE TACKLING** When players tackle, they now automatically shift into a lower tackle. The shift speeds change depending on the speed of the player who executes the tackle. This enables for new tackling animations including a slide, roll and tackle from the side.

**Forget the cliched narrative of Major League Soccer (MLS) and its transfer fees being the lifeblood of the game. Our youth academies, signing young graduates of our sport, and our state of the art video analysis mean that clubs put millions into the game each year. The most challenging part of this system is ensuring that these youngsters are ready to play at the highest levels and have the knowledge and tools to progress from the youth ranks. For clubs, this is of huge importance in a global game with heavy investment in the game and player development. FIFA's innovative Play The Game demo, which allows you to take a break in the action and play as a junior through to an MLS club, gives the player an insight into what a player may be like once he's achieved his full potential. And the Play The Game demo also is the first way that you can compete with your friends for the FIFA Ultimate Team card pack when it releases later this year. In FIFA 22, there will be a presence of 48 U.S. Soccer legends, and all 34 MLS clubs will have at least one U.S. Men's National Team member. The first-ever NFC club, the Philadelphia Union, along with the Atlanta United FC and Toronto FC are all set to play in the FIFA 22 edition, setting the stage for the final clubs to be announced. To give players the**

**opportunity to interact with these legends and the clubs they've supported, we've also added a handful of U.S. Soccer legends into the FUT Draft process. Updated Scouting Playing the game as a scout has been one of the most popular new features in FIFA 21, with over ten million in-game scouts downloaded to date. In FIFA 22, we're continuing to build on that strategy with the Player Flow scouting system. The Player Flow scouting system allows you to investigate prospective players via three different scouting routes. Your starting position will be in a city with a prospect, but you can get closer to your desired move with a variety of scouting methods. If you get closer to a move, you can pick whether you want to give a player a bid to sign or play him in your current club's next game as a scout in the new Director of Scouting. As you approach your move, the game will offer you the option to bid for a player, adding a Player Flow fee to the bid price. This will prompt a response from the player's club. At**
